

**Curriculum Vitae
Pali Lehohla**

1. **Name:** Pali Jobo Lehohla
2. **Date of Birth:** 1957/09/27
3. **Sex:** Male
4. **Marital status:** Married with three adult children
5. **Nationality:** South African
6. **Employer:** Independent consultant
7. **Education:**

<u>School, college and/or University Attended</u>	<u>Degree/certificate or other specialized education obtained</u>	<u>Date Obtained</u>
UN RIPS University of Ghana	Population Studies	1981
National University of Lesotho	B.A. Econ & Stats	1980

<u>School, college and/or University Attended</u>	<u>Degree/certificate or other specialized education obtained</u>	<u>Date Obtained</u>
Harvard Business School	Executive Leadership	January-August 2002
University of Stellenbosch	Business Management	1988

Other Relevant Training:

Senior Executive Programme – Harvard University,
Project Management - Wits University, Certificate in Toponymy
Management Certificate - University of Pretoria
Statistical Analysis Software (SAS) - Decision Support Services Randburg
Research Methods and Praxis - Human Sciences Research Council (HSRC)

Awards and Honorary Degrees

1. Certificate of Recognition for contribution in public service conferred by his alma mater United Nations Regional Institute for Population Statistics University of Ghana in December 2015.
2. Honorary Doctorate Commerce conferred by University of Stellenbosch, South Africa, December 2015.

3. Honorary Doctorate of Science conferred by University of Kwazulu Natal, South Africa, April, 2018.
4. Honorary Doctorate of Science conferred by the University of Zululand, South Africa, December, 2020.

8. Capacity Building Programmes

1. In 2009 a dream built over 17 years materialised. Jointly with the first director Prof Herman Geyer we established the Centre for Regional and Urban Innovation and Statistical Exploration (CRUISE) in a collaboration between Statistics South Africa and the Department of Geography and Environmental Studies at the University of Stellenbosch to provide research and training in the field of urban and regional systems. CRUISE is involved in capacitating the public sector, non-governmental organisations. The centre has produced in excess of 80 Masters students from StatsSA and have elevated the utilisation of statistics in policy making in South Africa. The University of Stellenbosch was elevated in publication ranks by virtue of this centre.
2. With Statomet at the University of Pretoria, I established a training programme for my staff in the office of Statistics in the Homeland of Bophuthatswana in 1991. The programme produced a good part of the core leadership group at Statistics South Africa where I was the longest serving head of department in South Africa.
3. I built relations with the University of Makerere, Uganda where I sent the first contingent of StatsSA staff in 2001
4. Another contingent proceeded to EASTC in Tanzania in 2001
5. Language as a barrier in statistical organisations was an impediment. By collaborating with ENSEA in Cote d'Ivoire a contingent of staff from StatsSA went to ENSEA to study statistics in French.

9. Countries of Work Experience: Cambodia, Sudan, Afghanistan, Iraq, New Caledonia-(Noumea), Nigeria (Kaduna State), Lebanon, Malawi, Vanuatu, Lesotho

10. Employment Record:

From: 2017 **To:** current
Self-Employed: Independent consultant
Positions held: Expert Statistician

From: 2021 **To:** Present

Position: Director Stakeholder Relations
Institution: Economic Modelling Academy
Responsibilities: Development of curriculum and teaching on statistical requirements and inputs for economic modelling

From 2018- **To:** Present

Title: Professor of Practice

Institution: University of Johannesburg

Title: Director Stakeholder Relations

Institution: Economic Modelling Academy

From: 2000 **To:** 2017

Employer: South African Government

Positions held: Statistician General of South Africa

From: 1995 **To:** 2000

Employer: Statistics South Africa

Positions held: Chief Director Demography

From: 1990 **To:** 1995

Employer: South African Government

Positions held: Director Statistics

Detailed Tasks	Name of assignment: Statistician-General of South Africa
Statistician-General of South Africa 2000-2017	Work Undertaken • Developing guidelines for the implementation of the UN Fundamental Principles for Official Statistics • Developing statistical legislation • Developing Statistical Methods and Standards through the United Nations Statistical Commission for inter alia ○ Sources and materials for economic statistics, population statistics, social statistics and environmental statistics ○ Creating the infrastructure for compilation, processing and dissemination of statistics ○ Leading the organisation in producing 232 high quality statistical series a year - a series each day. These are monthly, quarterly, annual and five yearly statistics ▪ Economic statistics such as the CPI, national accounts, annual financial statistics, monthly retail sales, census of economic activities, general household survey, quarterly labour force survey, census of the population ▪ Production and maintenance of economic sampling frames and dwelling frames from which samples are continually selected ▪ Managing and classifying statistical units and maintaining frames ▪ Policy Research in application of statistics

Statistical Advisor Statistical Strategy	• Provide advice to government ◦ Legislative change to the SARS law to have StatsSA access SARS records for purposes of building a Statistical Business Frame ◦ Development of the Statistical Business Frame and classifying by ISIC and applying measure of size by sector based on dti recommendations • Global collaboration and maintaining bi-lateral relations with countries for purposes of strengthening statistical methods Name of assignment or project: Statistical advice to the Pacific Statistics Board Year: 2017 Location: Noumea-Oceania Small Island Developing States (SIDS) Client: Pacific Statistics Community Main project features: Provided strategic advice on the management of regional statistics system for the Pacific Statistics Community and presented a paper on Unleashing the Power of Pacific Data, reflecting on its fragility but richness in flora and marine fauna including its potential for tourism. Positions held: Independent consultant Activities performed: • Framed the statistical challenges of the SIDS • Provided a high level roadmap for addressing challenges drawing from the Africa Symposium for Statistical Development (ASSD) which I championed as the Statistician General of South Africa • Advised on the regional work programme of the SIDS
Research Associate	Name of assignment or project: Multidimensional poverty measurement Year: 2017-present Location: England Client: Oxford Poverty and Human Development Initiative Main project features: Preparing analytical reports on multidimensional poverty measurement – Retainer of 2 days per month. Positions held: Independent consultant Activities performed: • Mobilising policy reforms in favour of using the Multidimensional Poverty Index (MPI)

Statistical Advisor Population Census	• Advocating for the MPI to be a recognized measure for poverty in the SDGs • Developing concept note for South Africa to use business poverty lens for poverty measurement • Developing advocacy materials for MPI use, inter alia, animations and opinion pieces in local and international media Name of assignment or project: Situation analysis for Lebanon to conduct a population census in the United Nations 2020 Round of Housing and Population Year: 2018 Location: Beirut Client: UNFPA and Lebanon Statistics Office Supervisor: <u>Asma Kurdahi</u> <u><kurdahi@unfpa.org></u> Main project features: Assessment and developing a policy document for political support for Lebanon to run a population census in over 80 years since the last one was run. Positions held: Consultant Activities performed: • Needs assessment for a census • Identifying constraints for census taking • Evaluating risks • Developing a plan for mobilisation in favour of a census
Statistical Advisor Evaluation of Kaduna State Statistics	Name of assignment or project: Evaluate the Kaduna Bureau of Statistics in Nigeria Year: 2018-2019 Location: Nigeria Client: Kaduna Statistics Office Supervisor: Elizabeth Omoluabi <u><elizomoluabi@gmail.com></u> Main project features: Appointed to evaluate the Kaduna Bureau of Statistics in Nigeria and provide recommendations on how to develop a world class statistics institution. Issued a report titled “Institutional Assessment of the Kaduna Bureau of Statistics” Positions held: Independent consultant Activities performed:

Statistical Evaluation on chronic unemployment and what needs to be done	• Assessment of Kaduna Statistics System in the context of the Nigeria National Statistics System and development requirements for Kaduna State • Developed the strategic plan for KDS • Developed an implementation plan • Developed an organisational structure for execution Name of assignment or project: Researching South Africa chronic youth unemployment Year: 2019 September to March 2020 Location: Pretoria Client: UNDP Supervisor Ayodele Odusola <ayodele.odusola@undp.org> Main project features: • Research Paper on Deeper Understanding of Unemployment in South Africa Positions held: Consultant Activities performed: • Researcher and author of paper on Deeper Understanding of Unemployment in South Africa • Reviewer of other contributed papers on unemployment
Statistical Advisor	Name of assignment or project: Introduction of Tourism Satellite Account Year: 2019 to 2020 Location: Lilongwe Client: UNWTO and Department of Tourism Malawi Supervisor: <u>Vanessa Satur</u> <vsatur@unwto.org> Main project features: • Developing the Tourism Satellite Account Positions held: Consultant Activities performed: • Developing the Strategy Document for Tourism Statistics

Statistical Advisor	• Developing Domestic Survey Programme • Developing Inbound and Outbound Tourism Tools Name of assignment or project: Statistical Capacity Building for some selected countries of the South Pacific Community Supervisor Andy Calo <acalo@vanuatu.gov.vu> Year: 2021 April to September Location: Vanuatu Client: UNFPA & Vanuatu Statistics Office Supervisor Main project features: • Advising on the Legal review and reform Positions held: Consultant Activities performed: • User consultation to assess user needs • Design of legal framework consistent with the ten UN Fundamental Principles for Official Statistics • Design of an appropriate strategy for legal reform consistent with Vanuatu National Development Plan • Pinning the essential and applicable pillars for statistical development in Vanuatu • Training Staff in the implementation of statistics law consistent with the production framework of statistics, paying attention to sources and use and users of statistics • Designing a risk based framework for ensuring success for implementation of the statistics law.
Statistical Advisor Strategy	Name of project: Strategic Direction of National Statistical Office in the Context of the Digital Transformation Year 2021 August – September Thailand Supervisor Ms Duangkamol Ponchamni UNFPA -Thailand Activities Performed • Conduct a mapping to assess of relevant documentation to establish the current state capacities and resources in National Information System and across the National Statistics System

Statistical Advisor Census	• Conduct the comparative reviews on the strategic direction of Thailand National Statistical Offices with five other countries • Assess readiness and capacity gaps of NSO through strengths, weaknesses, opportunities and threats analysis • Review best fit of the NSO central and provincial structure on integrated data innovation aspects • Present the finding and recommendations to policy makers and other stakeholders Name of project: National Statistical Office Prospects for a hybrid census for Thailand Supervisor Ms Duangkamol Ponchamni UNFPA -Thailand Year 2021 September – December Thailand NSO • Identifying what hybrid census means and guiding principles • Assessing prospects for a hybrid census • Making recommendations
Statistical Advisor On Digital Labs	Name of project: AfDB Digital Labs Aimed at removing Friction, Capture once use and reuse, and Augment Supervisor Mr MAHJOUBI, RAFIK <R.MAHJOUBI@afdb.org> Year 2022 March – June 2023 • Research into the Needs, Relevance and Design of Digital Labs for NSOs and other data stakeholders in Africa • Design a strategy • Consult on the strategy • Develop a work programme for implementation
Statistical Advisor on Statistical Law Reform arranged by PARIS21	Year 2022 August – December 2023 Supervisor: Philippe GAFISHI <philippe.gafishi@oecd.org> Name of Project: Lesotho Statistics Law Reform – PARIS21 • Preparing a base paper for Statistical Law reform • User consultation to assess user needs • Design of legal framework consistent with the ten UN Fundamental Principles for Official Statistics

World Food Programme	• Design of an appropriate strategy for legal reform consistent with the National Development Plan of Lesotho • Presenting the results Year 2023 September to December Supervisor: Hein ZEELIE <hein.zeelie@wfp.org> Research questions on food security and objectives ➤ Which data sources are applicable in informing strategies, plans and policies addressing the food security challenge? ➤ To what extent are the agricultural statistics adequate in terms of informing strategies, plans and policies informing food security? And ➤ What effective models can be designed and what modelling capability is required to address these mission challenges?
SASOL	Year 2023 September – February 2024 Supervisor: Nkosi, Brenda (RB) <brenda.nkosi@sasol.com> to establish baseline information in its key social investment focus areas that: • describes the development needs of its fenceline communities; • informs an analysis of those needs and opportunities to address them; • enables the design of future shared value social investment programme and project interventions and an improved model for their delivery; • identifies future resource requirements for their implementation and sources of supplementary resources that could augment those provided by Sasol; • facilitates improved programme planning and alignment of these interventions with local, provincial and national priorities; • provides a yardstick against which to measure the impact of those interventions; • enables improved data-driven monitoring and evaluation;

Adhoc Policy Briefs and Advice and Public Speaking Weekly Columnist	• supports refinement of the company's framework for impact measurement; and • supports Sasol's future decarbonisation journey. Year 2018 to present for multiple clients Business Report from 2002 to date Sunday Times Daily from 2022 to date Daily Maverick Occasionally
---	--

11. Institutional Roles as Statistician General and Capacity Building Programmes Undertaken

1. Co-Chairperson of PARIS21 from 2003-2006
2. Since 2002 September, I dedicated my time to a weekly column that enlightens society on matters statistics. The column continues to date. And since 2016 I write two columns a week. The columns are available at Articles by Pali Lehohla | Daily Voice (South Africa) Journalist | Muck Rack
3. Established Maths4Statistics Programme after ICOTS6 was hosted in South Africa in 2002 and in 2006 I led a team of 30 teachers to Brazil for ICOTS. The output of this was to jointly with the University of KwaZulu Natal create a programme for teaching statistics to teachers. The University of KZN, Professor Delia North continues teaching the programme
4. Chairperson of the 39th and 40th Session of the United Nations Statistical Commission 2008-2009
- 10** Member of the International Association for Official Statistics
- 11** Member of the International Statistics Institute
- 12** Honorary President of South African Statistics Association since 2007
- 13** Chairperson of the African Symposium for Statistical Development (ASSD) 2006-2017
- 14** Sponsor of the Young African Statisticians (YAS) 2008-2017
- 15** United Nations Economic Commission for Africa (UNECA) African Board for Statistics issued in recognition of Pali Lehohla's contribution 2008
- 16** Host and Chairperson of Local Organising Committee of 57th Session of ISI – 2009 Durban where the largest contingent of Young African Statisticians attended and presented papers. The Young African Statistician movement was born as a deliberate effort to have a lasting legacy for Africa post the ISI hosting in South Africa. Today the Young African Statistician movement boasts about 340 members across the African continent.
- 17** Vice President of the ISI 2010-2013

- 18** Host and Chair of Local Organising Committee of the 1st World Data Forum January 2017 Cape Town
- 19** Host and Chair of the 28th International Union of the Scientific Study of Population (IUSSP) 2017 Cape Town
- 20** In recognition of the collaboration I fostered between StatsSA and ENSEA in Cote d'Ivoire I was invited by the AfDB to deliver a Nelson Mandela lecture in at the AfDB in Abidjan in September 2018 as part of the unveiling of Nelson Mandela statue at the UN in New York
- 21** Honorary Doctorate University of Zululand, South Africa, December 2020

I am passionate about the importance of evidence in decision making including its own blind spots. The United Fundamental Principles for Official Statistics provides a fundamental framework for addressing these blind spots and I have been part of the UNSC team that worked on the UNFOPS towards their adoption by the UN General Assembly. What is very important for me is the use of evidence as a catalyst for stakeholder claims, discussions, agreements and moving towards social compacts. Lastly, development of social and economic policy and the threats posed by information technology and finance to democracies is where I would focus my career going forward. This is with the aim of enabling statistical information to preserve its non-rival attribute and allow the maximum access and use possible by the global audience.

Pali J Lehohla
